

BRIEF INSTRUCTION MANUAL FOR MEMORY WATCH

The Mega Memory Watch set includes:

1. Mega Memory Watch
2. CD ROM with user manual & Installation
3. USB extension cable
4. Gift box
5. Brief instruction manual

The CD contains the following contents:

1. Users manual
2. Application software --- U-Storage Tools2.5 (This is only applicable for Microsoft Operation System)
3. Drive Software for Win 98 --- Win98Driver2.0

Operation for using this memory watch as a simply memorizer disc only:

1. For Win 98 Operation System, please double click Drive Software -Win98Driver2.0 and follow the instructions to install this operation system into your computer.
2. For Linux Operation System, please follow the instruction below to mount the device,
Execute `cd /etc/sysconfig/ (cat /etc/sysconfig/hwconf | more)`
 - . Check the device information in hwconf, write down the mount point.
 - . Make a directory in /mnt (ex: `mkdir /mnt/usbHD`)
 - . Then, execute `mount /dev/sda1 /mnt/usbHD` (if mount point was `.dev/sda`)
3. For other application system, you just need to plug this watch to the USB port on your PC or laptop and you can use it as a normal storage disc.

Operation for setting up a security area in this memory watch:

Please double click U-Storage Tools2.5 and set up this application software. After it finishes, you will find a new button at the bottom right corner. Please double click this button and you will be asked to establish a password for the security area. You can adjust the memory size for security area and public area. Please note this is only applicable for Microsoft Operation System.

NOTE:

1. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the User's authority to operate the equipment.
2. If the device is USB 2.0, make sure that the computer is USB 2.0 and USB 2.0 driver has been installed, otherwise the device will function as USB 1.1.
